

**Dance with me** – Wildfire Gypsies – All rights reserved

One day as we travelled the land of our kin  
A storm was approaching we stopped at an inn  
The manor as old as the stories inside  
But grandest the tale of it's tragic demise

Checked into our room and then went for a stroll  
Down long wooden stairs to the ballroom below  
From there in the darkness a song we could hear  
The voice of a woman so haunting and clear

Chorus

She said dance with me dance with me all thru the night  
Dance with me dance with me you'll see it's right  
I have been waiting for you to arrive  
Dance with me Dance with me make me alive

Was in the great war time back so many years  
A tale of two lovers that ended in tears  
The two torn apart as he entered the fray  
He promised to come back and take her away

She waited so long for her love to return  
Each night in the window a candle she'd burn  
And then in the dark she would move down below  
And sing for the love who died so long ago

Chorus X 2
